Game Developer

I am a self-driven and highly motivated developer committed to crafting novel interactive experiences. I have been developing games for eight years. During that time I have led a team of three through the development of two commercial games and touched almost every aspect of game development. I currently specialize in creating realtime visual effects.

Skills:

Unity, Godot, Unreal Engine 5, MonoGame, C#, C++, HLSL, GLSL, OpenGL, STEAM Integration, Git, Audio Implementation, Html, CSS, JavaScript, Python, React, Node, Django

Experience:

JofiSoft LLC— *Game Developer, Seattle, WA*

March 2019 - Current

One of a three person team creating adventure games in the Unity game engine. Designed and implemented game systems using C#. Created 3d assets using Blender and GIMP. Designed audio assets using Ableton LIVE.

Key Projects:

- **VideoHole: Episode II:** Unity, C#, HLSL
- **VideoHole: Episode I:** Unity, C#, HLSL

General Assembly— *Software Engineer Graduate, remote*

March 2019 - Sept 2020

Building full-stack web applications using computer science fundamentals, collaboration tools, and multiple programming languages. Applied object-oriented programming concepts, leveraging programming language libraries. Collaborated across functional teams to design, develop, and execute development projects using Agile principles. Assisted in defining system architecture to shape user experience.

Key Projects:

- **Travel Blog:** Python, Django, JSX, HTML, CSS
- **Tour Finder:** Google Maps API, MongoDB, Node, Express, React

Team Audio (Contract) — *Sound Designer / Audio Implementation*

August 2019 - October 2019

Provided custom sound assets for clients in the video game industry. Designed audio systems specific to the client's project. Used proprietary software and adapted the workflow to the specifics of the project.

Key Projects:

- **Ra Ra Boom:** Unity, C#, Ableton Live

Education:

Savannah College of Art and Design
BFA in Sound Design

Certifications

Software Engineering Immersive | General Assembly, Remote, 2020
